This was the first time that Terry, Jackson and I got together to just hand out and praise the Lord.

---

We shared a couple of songs that Terry liked that Jackson and I had written. Then we decided that it would be fun to write a song with Terry. So Terry started playing on his keyboard and Jackson on the guitar and I just started singing whatever God would give me.

Terry asked about have we ever thought of how much God loves us. And how big is the new heaven and earth. ? Not really, but he gave us measurements and I think we keep this in mind. When I started with Deep and Wide. Because he was sharing with us depth and wideness of Gods new home for us.

## Revelation 21:16-17 (TLB)

<sup>16</sup> When he measured it, he found it was a square as wide as it was long; in fact it was in the form of a cube, for its height was exactly the same as its other dimensions—1,500 miles each way.

<sup>17</sup> Then he measured the thickness of the walls and found them to be 216 feet across (the angel called out these measurements to me, using standard units).
